Autism is Unique!

ABA (Applied Behavioral Analysis)

It's difficult to put the pieces together by yourself. But, you're not alone!

Children's Developmental Center offer a program to assist children between the ages of 2-4 years who have received a medical diagnosed of autism.

ABA is the science of changing socially significant behavior. Therapy focuses on identifying the function of a behavior, combined with examining the environment to develop a plan for behavior modification.

ABA Therapy has become widely accepted as one of THE most effective treatments for behavior change. Therapy focuses on what is observable and measurable. Precise and frequent data collection drives the course of treatment.

What is Autism?

Autism, or autism spectrum disorder, refers to a range of conditions characterized by challenges with social skills, repetitive behaviors, speech and nonverbal communication, as well as by unique strengths and differences. We now know that there is not one autism but many types, caused by different combinations of genetic and environmental influences.

Autism is UNIQUE.

Just like a rainbow. It's full of different colors that stand out, and together make a beautiful spectrum of color.

Referrals

We work with most insurance companies to provide ABA Services. Requirements vary, so please contact your health insurer. However, most require the individual have:

- a medical diagnosis of Autism or an Autism Spectrum Disorder
- a doctor's referral for ABA services.

Evaluation

Following the evaluation, a personalized treatment plan will be created. This plan will be the working document for the therapists and used to benchmark and quantify progress made by the child.

We believe in the Team Approach and may share parts of the treatment plan with other professionals involved in your child's education and services.

Focus of Service

The services provided will focus on communication, social, life, play, physical, and behavior skills. Parent training sessions will also be provided.

Cost

We work with most insurance companies to provide ABA services. However, families are responsible for deductibles, co-pays, and coinsurance payments. Payment plans are available.
